

Kingwest Academy Program for the Gifted - K-8

Kingwest Gifted Program provides gifted high-ability students with accelerated and enriched interdisciplinary curriculum that uses advanced and complex concepts to develop higher order thinking, active exploration, and discovery. We know and respect the unique nature of the gifted mind, which is why our teaching methods create a student-centered environment that allows independence and complex inquiry to optimize the development of intellect, creativity, and love of learning.

Gifted and talented courses are open for students in grades 3-8. We also offer elementary gifted program for students with dual exceptionalities, who are gifted and have special education needs.

Kingwest K-8

Kingwest Academy knows that elementary years are crucial for building a rich academic foundation, which is why we provide a rigorous and customized elementary school curriculum. We know that “one-size-fits-all” has no place in education. Teaching and learning at Kingwest Academy are infused with continuous checkpoints that inform of student’s needs, be it in the form of additional support or enrichment. Various developmental stages of elementary students are met with the flexibility of instructional resources that encourage exploration, positive learning experience, and build self-confidence.

Our elementary curriculum provides students with challenging coursework while they build their literacy, mathematics, and critical thinking skills across all content areas. The transformative years of middle school are met with student centered focus on building self-esteem, academic confidence, and comprehensive curriculum that prepares students to succeed in high-school course work and beyond.
